## **United States Coast Guard QUALSHIP 21 & E-Zero Program**

---

---

### **1. Purpose**

- 1.1. This Technical Alert issued by the Bahamas Maritime Authority (BMA) to provide information on the United States Coast Guard (USCG) QUALSHIP 21 and E-Zero programs.

### **2. Introduction**

- 2.1. United States Coast Guard (USCG) efforts to eliminate substandard shipping have focused on improving methods to identify poor-quality ships and recognising and rewarding higher-quality ships at Port State Control (PSC) inspections. Therefore, on 01 January 2001 the USCG implemented the QUALSHIP 21 initiative to identify high-quality ships and provide incentives to encourage quality operations.
- 2.2. The USCG introduced the E-Zero designation on 01 July 2017 for ships enrolled in the QUALSHIP 21 program that meet strict additional environmental requirements.
- 2.3. E-zero is an initiative that focuses on compliance with international environmental conventions and United States ballast water regulations. The E-zero designation is intended to provide a higher level of recognition within the existing QUALSHIP 21 program.
- 2.4. Details on the incentives for QUALSHIP 21 ships and new incentives for QUALSHIP 21/E-Zero ships, eligibility, enrolment, and renewal requirements are available on the USCG website at:  
<https://www.dco.uscg.mil/Our-Organization/Assistant-Commandant-for-Prevention-Policy-CG-5P/Inspections-Compliance-CG-5PC-/Commercial-Vessel-Compliance/Foreign-Offshore-Compliance-Division/Port-State-Control/QS21/>.

### **3. QUALSHIP 21 and The Bahamas**

- 3.1. The 3-year rolling average detention ratio for 2018-2020 was 0.31% and The Bahamas is therefore eligible for QUALSHIP 21 status.
- 3.2. The Bahamas Maritime Authority (BMA) continues to actively monitor all PSC inspections and places great importance on maintaining a low rate of detentions in both the USA and elsewhere.
- 3.3. Owners and Managers of Bahamas registered ships are therefore urged to ensure that any ships calling at ports in the USA are fully prepared for the possibility of a PSC inspection by the USCG.
- 3.4. It should be noted that there is no longer automatic reenrolment of qualified ships for QUALSHIP 21. Owners must reapply for QUALSHIP21 when the current certificate expires.
- 3.5. All lifesaving appliances, firefighting equipment and essential equipment should be tested before arrival, be in full working order and ready for immediate use and the crew adequately trained for and familiar with their duties. Please also refer to [MN093 – Port State Control Inspections](#).

### **4. QUALSHIP 21 companies operating Bahamas registered ships**

- 4.1. The USCG periodically publishes a list of ships that have gained QUALSHIP 21 status. Based on the most recent USCG list (15 January 2021), the BMA is currently aware of the following Companies operating Bahamas registered ships that have qualified for QUALSHIP 21:

- Acheon Akti Navigation Co. Ltd.
